How it works

By lending your Bitcoin to collateralized loan, you are able to earn a fixed tier rate return. The whole lending and borrowing process is automatically executed by robo.

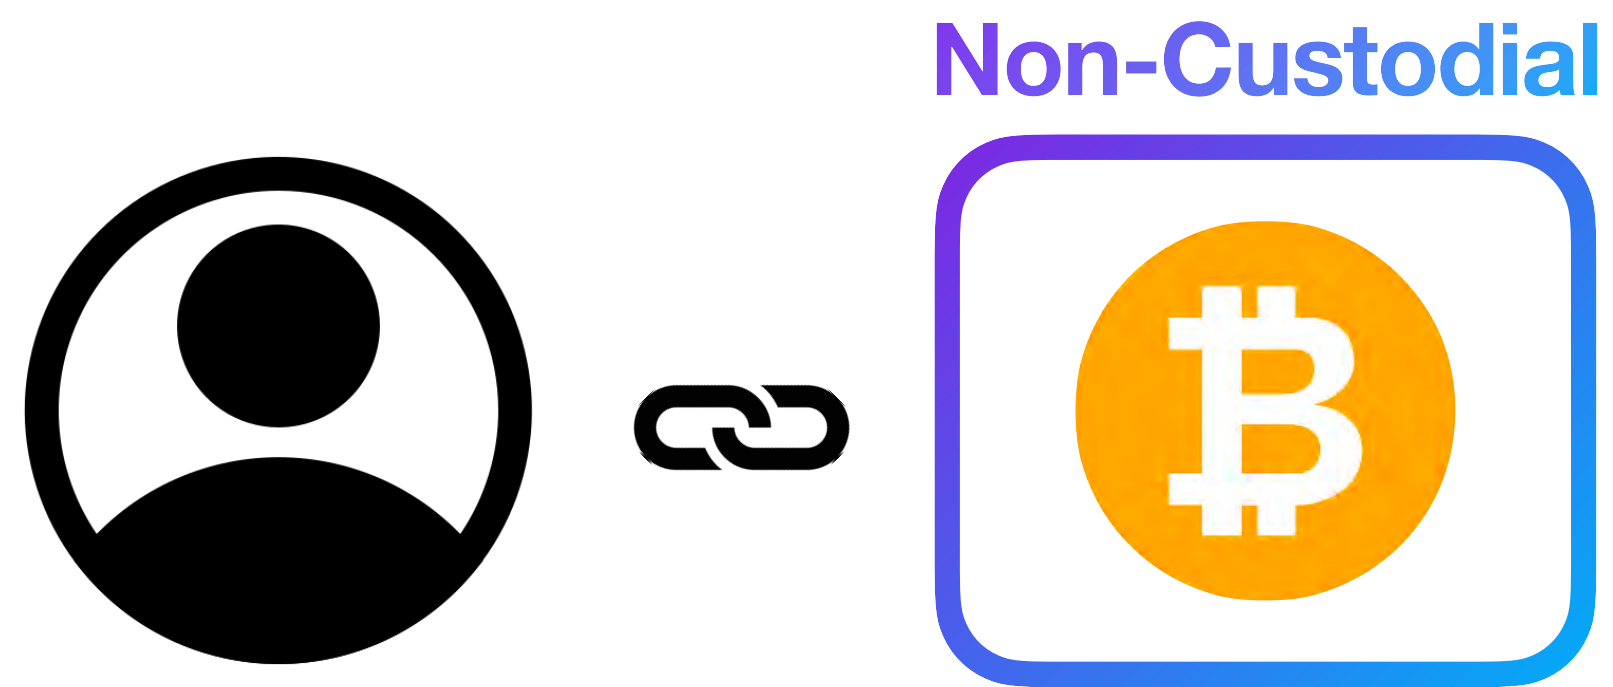

```
graph LR
    User1((User)) -- "1. Lend" --> Reserve[reserve]
    Reserve -- "3. Borrow" --> User2((User))
    Reserve -- "2. Lock" --> Collateral[collateral]
```

EXP Date	2022/12/12 23:59
Settlement Cycle	Daily
Currency	BTC
Renewable	Yes
Per Unit	0.01 BTC
APY Tier Rate	
0-100 BTC	3.1 %
100-300 BTC	2.9 %
> 300 BTC	2.0 %

The assets will be returned to members' wallets on the EXP date.

**Tech-enabled trust by state-of-the-art
bitcoin smart contract and Discrete
Log Contract technology**

The screenshot displays the SeFo website interface. At the top, the navigation bar includes the SeFo logo, links for 'Service', 'About', and 'News', and a language selector set to 'EN'. The main header features the text 'Grows Bitcoin safe & easy on the trustable investment platform' alongside images of Bitcoin and a custom token.

The 'Low Risk Vault' section is highlighted, showing the following details:

- Net APY:** 3.1%
- Contract Period:** 1 week
- Investment Amount:** 0.01 BTC (with minus and plus buttons for adjustment)
- Expired Date:** 9.22.2022 (with a 'Subscribe' button)

How it works: By lending your Bitcoin to collateralized loan, you are able to earn a fixed tier rate return. The whole lending and borrowing process is automatically executed by robo.

The process flow diagram illustrates three steps:

- 1. Lend:** A user icon points to a 'reserve' box containing several Bitcoin icons.
- 2. Lock:** An arrow points from the 'reserve' box to a 'collateral' box, which is locked with a padlock icon and contains several custom token icons.
- 3. Borrow:** An arrow points from the 'collateral' box to a borrower icon.
